A Practitioner's Guide to Stem Girdling Roots of Trees

■ Impacts on Trees, Symptomology, and Prevention

Gary R. Johnson
University of Minnesota

Richard J. Hauer
Minnesota Department of
Agriculture

■ Trees may decline and prematurely die as a result of the stresses induced by stem girdling roots. Or, they may appear healthy and normal until they suddenly fail during a windstorm, breaking at or near the point where girdling roots have compressed and weakened the stems.

A Practitioner's Guide To Stem Girdling Roots of Trees
